(57)

A skylight assembly (10) is provided for installing in an opening (100) of a roof with a pitch from 1 to 45 degrees. The assembly (10) comprises a base structure having a base frame (12) positioned in the opening (100) and a top structure movably coupled to the base structure for moving between a closed position and an open position. The base structure has a soaker tray (14) arranged around the base frame (12) and extending to at least an adjacent roofing material. The top structure has a capping (28) arranged on its top frame (24) for preventing water entry into the assembly (10).
